

# Creating a GitHub pages link!

In this short doc, we will walk you through the simple process of creating your very own github account, and uploading your project to create a unique link to review your project online.

1. Go to [www.github.com](https://www.github.com) and create an account.
2. Go to "your repositories"
3. Click "new"
4. Set up the repository name and select the "Initialize this repository with a README" check-box
5. Press "create repository".
6. You have now reached this point:

7. Drag and drop your project files into this page. Pay attention: drag the files from inside your folder like in the picture, **not the whole project folder!**

8. Write something in the commit changes box and press "commit changes"

/pacman/js/ghost.js

/pacman/js/pacman.js

/pacman/js/utlis.js

9. Go to "settings" in your repository
10. Under "GitHub pages" select the source select button to show "master-branch".
11. After doing that, your page will refresh. Go back to the "GitHub pages" section, and see that you now have a link for your project.
